Github: <https://github.com/ABHISHEKTOMAR256>

Email: abhitomar1608@gmail.com
Mobile: +91-8638260599

SKILLS

Languages: Python, C, JavaScript, SQL
Technologies: HTML, CSS, Bootstrap, React, Next.js, Node.js, Express.js
Data & Tools: Pandas, openpyxl, Excel, Git, GitHub
Embedded Systems: Arduino Uno, ESP8266 NodeMCU, Proteus Simulation

PROJECTS

Pawmarg Trust — NGO Donation Platform [GitHub](#) Full-Stack Web Application

- Developed a full-stack donation website for an animal welfare NGO with a UPI QR-code payment flow.
- Built an admin panel for logging and tracking donations.
- Engineered the backend with Node.js and Express.js to handle secure payment verification and data storage.
- Tech Stack:** HTML, CSS, JavaScript, Node.js, Express.js

Hybrid Piezoelectric–Solar Energy Harvesting System [GitHub](#) Hardware / Embedded Systems Project

- Designed a 16-disc piezoelectric array combined with solar input, controlled via Arduino Uno, to harvest energy from footfall and sunlight.
- Validated the design through Proteus circuit simulation and a working hardware prototype.
- Programmed the Arduino Uno controller and integrated an ESP8266 NodeMCU bridge with Blynk for real-time smartphone monitoring.
- Tech Stack:** Arduino Uno, ESP8266 NodeMCU, Proteus, Blynk

Suvidha-Citizen Portal [GitHub](#) Data Analysis Project

- Built an Excel-based performance dashboard from a 10,000+ row plant dataset.
- Applied ETL processing, SUMIFS-based filter logic, KPI cards, and dynamic charts to surface plant performance metrics.
- Automated data cleaning and analysis using Python and pandas to streamline reporting workflows.
- Tech Stack:** Python, pandas, openpyxl, Excel

Student Portal [GitHub](#) Full-Stack Web Application

- Built a web application allowing Students to maintain their attendance and CA records online.
- Created a structured record-keeping system for faculty to update and manage student performance data.
- Implemented the backend using Node.js and Express.js to handle data storage and retrieval.
- Tech Stack:** HTML, CSS, JavaScript, Node.js, Express.js

Twin vision [GitHub](#) Full-Stack Web Application

- Built a web application for validating project requirements and tracking project progress.
- Designed a workflow to log milestones and flag requirement mismatches during development.
- Constructed the application using HTML, CSS, JavaScript, Node.js, and Express.js.
- Tech Stack:** HTML, CSS, JavaScript, Node.js, Express.js

CERTIFICATIONS

Artificial Intelligence Certification — Intel collaboration with Chandigarh University Linkedin	Aug 2025
HTML, CSS Certification — Cisco Networking Academy Linkedin	Dec 2025
Workshop of Google Kaggle — Google Linkedin	Nov 2025
Data Science Certification — Infosys Springboard Linkedin	Mar 2026
ECE Exhibition Workshop — Lovely Professional University Linkedin	Nov 2025
Python Programming Certification — Saylor Academy Linkedin	Dec 2025

ACHIEVEMENT

- Developed academic projects including Library Management System and Hotel Booking System.
- Skilled in HTML, CSS, JavaScript, React, and MongoDB through hands-on projects.
- Strong problem-solving and debugging abilities with a focus on web development and AI/ML.

EDUCATION

Lovely Professional University Bachelor of Technology — Computer Science and Engineering (AI/ML) CGPA: 9.07	Phagwara, Punjab 2025 – Present
South Point School Higher Secondary Education Percentage: 85%	Guwahati, Assam 2024-2025
Radiant Public School Higher Secondary Education Percentage: 90%	Saharanpur-Uttar Pradesh 2022 – 2023
